Silvère Lucquin

Medical technologies entrepreneur

France

Résumé

Creative and strategic entrepreneur who gets things done, I love to turn innovative technologies into meaningful products and successful ventures.
With both an Engineering and a Business education, I developed a keen interest for the medtech industry.

I value courage, ambition, selflessness and honesty.

Expérience

Okomera

CEO

septembre 2025 - Present (6 mois)

Ganymed Robotics

COO

octobre 2019 - décembre 2024 (5 ans 3 mois)

Région de Paris, France

The world's population is aging and obesity is becoming more prevalent. Every year, millions of patients require their knee, hip or shoulder cartilage to be replaced. But access to those complex and radical procedures remains problematic, even in the OECD countries.

At Ganymed, we believe technology could solve part of this dilemma by providing solutions that both improve outcome while democratizing access.

Since 2018, we've been developing advanced robotic technologies for orthopedic surgeons.
Supported by world class investors, surgeons and entrepreneurs, strong of 35+ incredible team members, we've secured 40M+€ of funding, won several national & international awards (including French Tech 2030 Laureat) and are now well underway to make a global impact.

Aditlys Medical
CEO
janvier 2018 - mai 2019 (1 an 5 mois)

Aditlys was a venture leveraging an innovative tissue technology to address the challenges of vascular access for dialysis patients. The company is now closed.

As the company CEO, I led fund raising activities, developped the team and supervised product development (R&D, Quality and regulatory as well as clinical activities).

CorWave
R&D Engineer - Project Manager - Employee number one
août 2012 - janvier 2017 (4 ans 6 mois)
Paris

CorWave is a Frenchtech 120 company aiming to change the clinical paradigm of heart failure patients by leveraging a unique membrane based technology to develop a novel LVAD (Left Ventricular Assist Device).
Founded in 2012 by MD start, the company has since won several national and international awards (including EIC accelerator award) and secured over €80M in funding, being backed by leading international investors such as BPifrance, Novo Holdings, Sofinnova and Ysios.

I joined the company in 2012 as their employee # 1, originally conducting the early developments of both products. I then transitioned to project and team management, contributing to pass the stages that led to the series A and B fund raisings.

SpineVision
1 an

Project Engineer
mars 2012 - août 2012 (6 mois)
Antony

I designed a proposal of a new operational model for the company.

Marketing Intern
septembre 2011 - mars 2012 (7 mois)
Antony
